

Senior QA Engineer

Senior QA Engineer with **9 years** of experience delivering reliable manual and automated testing for web and mobile applications across telecom, e-commerce, and edtech industries. Deliver quality through Agile SDLC and, more recently, Agentic SDLC with Cursor: story analysis, test planning, agentic testing, Playwright and JavaScript test generation, test reporting, and skill-based repair of existing automation. Design and maintain smoke and regression coverage; validate UI, API, and data. Salesforce-certified QA Engineer with hands-on experience testing the Salesforce platform, including AI-powered solutions. Lead QA across concurrent projects with onshore and offshore teams to reduce defect escape and support faster release cycles.

TESTING TOOLS

Mobil and Web Testing:	XCode, Android studio, ADB, Unix, Charles Proxy, Dev Tools, BrowserStack
API, DB and Microservices:	Postman, REST, SQL/CouchDB, Cassandra, MySQL, Azure Data Studio, Kafka, Camunda, SkyFM, Kubernetes
CMS and Clouds:	Sitecore, Adobe, Opera Cloud, Halo, Salesforce VIP CRM: Marketing, Service, Commerce Clouds
Automation Testing:	Java, Selenium, Cucumber, Playwright, JavaScript, Git/GitHub, AI Cursor, HTML, CSS, Ginger, Katalon Studio
PM and Docs:	Jira, Azure VSTS, Confluence, TestRail, X-Ray, Zephyr, qTest, iTrack, Google Analytics, Wiki

WORK EXPERIENCE

Senior QA Engineer

WTS

Remote **January 2024-Present**

Lead QA across concurrent e-commerce web and mobile projects, partner with onshore development and product and lead offshore QA, own the full defect lifecycle in Jira.

Transition delivery from Agile SDLC to Agentic SDLC with Cursor: analyze user stories, align on test plans, then run agentic testing skills or automation skills that generate Playwright and JavaScript/TypeScript tests, produce test reports.

Design and maintain Playwright and JavaScript smoke and regression suites for end-to-end coverage across multiple web applications and user flows. Build, update, and refine Cursor skills and roles, use them to repair existing framework tests and keep agent output aligned with team standards.

Perform comprehensive manual QA across Salesforce ecosystem, validating campaign journeys, audience segmentation, automation flows, service case management and CRM workflows for high-profile VIP client-facing products. Test and verify integrated AI-powered chatbot systems, ensuring accurate intent recognition, response accuracy and seamless handoff to live agents.

Execute functional, regression, smoke and exploratory testing across e-commerce web and mobile applications. Conduct cross-browser and cross-platform testing using BrowserStack and DevTools and validate mobile app on iOS and Android using Xcode, Android Studio, ADB and Charles Proxy.

SW Test Engineer

Amdocs AT&T

Remote **May 2022-January 2024**

Specialized in API and microservices testing across event-driven architectures, designing and executing comprehensive test collections in Postman covering end-to-end, integration, contract, smoke and regression scenarios. Validated message-driven workflows via Kafka and verified business process orchestration flows in Camunda across distributed microservices.

Built and maintained automated test frameworks using Java, Selenium, Maven, Cucumber and Ginger, integrating suites into Azure CI/CD pipelines for continuous quality feedback across deployments.

Conducted manual functional, UI, cross-browser and responsive design testing for web applications. Manually analyzed logs and adjusted Kubernetes configurations in Azure to investigate failures and support stable test execution across environments. Performed data validation across CouchDB, Cassandra and MySQL using Azure Data Studio, verifying data integrity across microservice boundaries.

Managed test planning, defect tracking and reporting through Jira and Zephyr, with documentation maintained in Wiki. Collaborated with onshore and offshore teams in an Agile delivery model, participating in root cause analysis and driving defect resolution to closure.

QA Engineer

OV Loop

Remote **June 2021-May 2022**

Collaborated with business and technical teams in an Agile env to deliver releases on time and ensure alignment with requirements and user stories.

Created and executed test strategies, test plans, and detailed test cases based on functional and business requirements.

Performed functional, regression, smoke, exploratory, UI, cross-browser, cross-platform, and responsive testing for web and mobile applications.

Conducted API testing using existing collections and updated test cases based on system changes and requirements.

Performed UI automation testing within the existing framework and analyzed results to identify failures and stability issues.

Collected and analyzed logs for troubleshooting, defect investigation, and verification of issues across environments.

Logged, tracked, and maintained detailed bug reports, ensuring clear documentation and effective communication with development teams.

QA Engineer

Solvd

Remote **May 2019-June 2021**

Collaborated with cross-functional teams including product managers, designers, and developers within Agile to ensure high-quality deliverables

Performed comprehensive testing of web applications, including functional, regression, smoke, UI, responsive, and cross-browser testing to validate product stability across environments

Validated data integrity during data migration processes, ensuring accurate and seamless transfer of information across system updates and releases

Executed API testing to verify backend functionality, reliability, and data consistency across integrated services

Designed, maintained, and optimized test cases and test suites to improve coverage and testing efficiency

Reported, tracked, and managed defects using bug tracking systems, ensuring clear documentation and effective communication of issues to dev teams

Maintained detailed QA documentation, including test plans, test results, and release validation reports to support traceability and process improvement

Manual Software QA Tester

EdCast

Mountain View, CA **March 2017 – May 2019**

Performed manual testing on Android and iOS mobile app, including functional, regression, and compatibility testing across multiple devices

Developed, organized, and maintained detailed test cases and regression test suites to ensure consistent coverage and support release quality

Collected, analyzed, and interpreted app logs and crash reports to identify root causes of defects and support effective troubleshooting and debugging

EDUCATION

Certificate Salesforce Certified Agentforce Specialist

Certificate Advanced QA Engineering / Computer Educational Center, San Francisco, CA

BA Environmental Education / Technology University
